

# GHOST IN THE HOTEL LOCKS: ONE KEY TO OPEN EVERY ROOM IN THE BUILDING

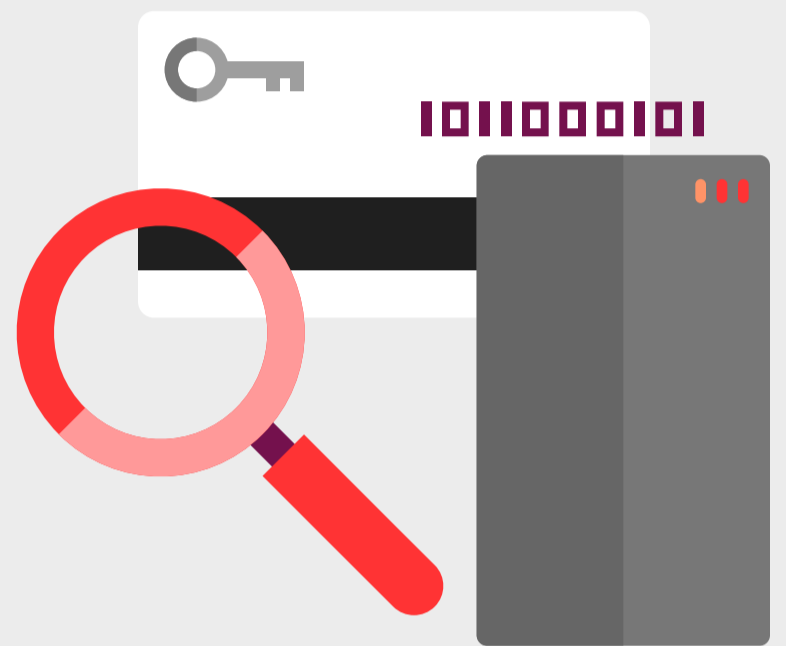

Researchers have found a way to access **EVERY ROOM** in a hotel with just one key

1.

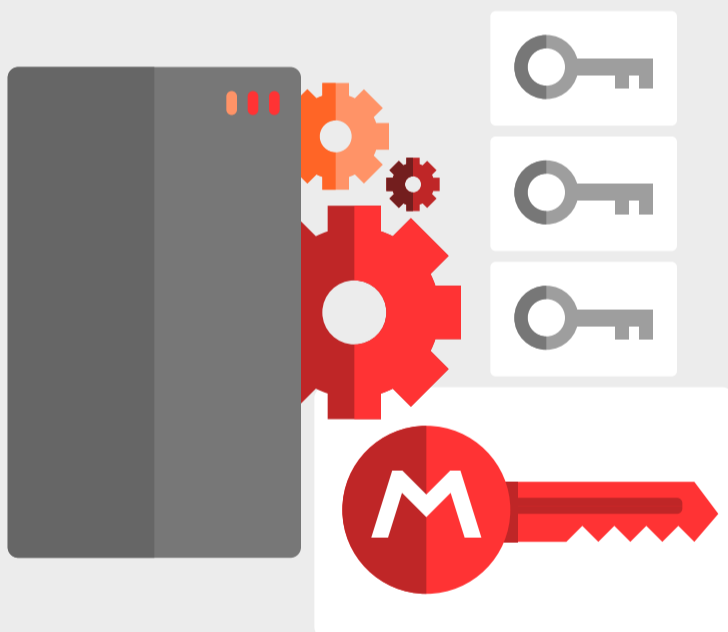

Attacker gets keycard for target hotel  
(even old/expired keycard will work)

2.

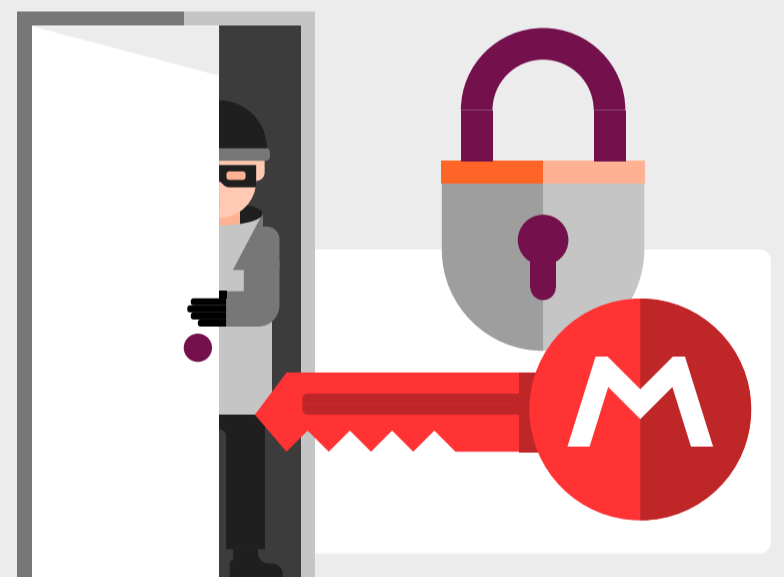

Keycard's data  
is scanned/copied by a small device

3.

Small device generates more  
keys and produces a master key  
after a few minutes

4.

Master key bypasses any lock in  
targeted hotel to grant  
unrestricted access to facility

## STAY SAFE – Always Follow Basic Travel Security Tips

Don't leave valuables in your room unless  
you put them in a safe

Use the door chain when in your room

Use a VPN when on hotel WiFi  
network

Use your credit card instead of debit and  
be on the lookout for fraudulent  
transactions
